Requirements:

- 1 - The call must be a BlackBerry MVS call. If the call was initiated from the desk phone, the call cannot be moved.
- 2 - BlackBerry MVS can ring up to four devices sequentially. In a Cisco Unified Communications Manager v6.1 and later environment, BlackBerry MVS can ring your desk phone and your BlackBerry smartphone.
- 3 - Unsupervised call transfer is not yet available in the BlackBerry MVS Server for Cisco Unified Communications Manager 6.1 and later.
- 4 - Call hold is not available on CDMA networks. (with or without BlackBerry MVS)
- 5 - Feature can be implemented on the cellular network but not on BlackBerry MVS.
- 6 - Feature support may vary depending on device and BlackBerry device software. Please contact your account representative for detailed information.
- 7 - Device initiated inbound calls not included.
- 8 - PBX Call recording dependent upon the network PBX configuration.
- 9 - Voice over Wi-Fi calling requires BlackBerry Device Software v5.0 and higher
