Requirements:

- 1 - BlackBerry MVS can ring up to four devices sequentially. In a Cisco® Unified Communications Manager v6.1 and later environment, BlackBerry MVS can ring your desk phone and your BlackBerry smartphone.
- 2 - Call hold is not available on CDMA networks. (with or without BlackBerry MVS)
- 3 - Feature can be implemented on the cellular network but not on BlackBerry MVS.
- 4 - Feature support may vary depending on device and BlackBerry device software. Please contact your account representative for detailed information.
- 5 - Voice over Wi-Fi calling requires BlackBerry Device Software v5.0 and higher
- 6 - Supported on cellular network and BlackBerry MVS with Cisco Unified Communications Manager 7.1 and later
