

# Strengthening the future of Higher Education

Offering students and educators a world  
of applications to keep them connected—  
in and out of the classroom.

 **BlackBerry**

The BlackBerry® platform offers a full mobility experience that supports education and future learning—with numerous applications that allow students and educators to manage every aspect of their life on and off campus with familiar technology.

### GPS & Mapping Applications

GPS and mapping applications help navigate a sprawling campus with classes spread out over a large distance.

### Productivity & Organization Applications

Applications, like course calendars, help students track homework assignments and course reading materials.

### Mobile Learning Applications

m-Learning applications provide on-the-go access to learning management systems for students, teachers, and faculty.

### Campus Life Applications

Students can view course guides, connect with peers, family and friends in their social network, and keep up to date on campus news.

### eBook Applications

eBook applications keep students study-ready and connected to the reference guides, class materials and books they need on the go.

### Campus Safety Applications

Student safety is top of mind, giving campus authorities access to secure information, the ability to push notifications, and retrieve GPS locations via a panic button.

## BlackBerry App World™

BlackBerry App World™ expands the BlackBerry user experience by offering a wide variety of quality-assured, fun and productivity-boosting applications built for BlackBerry smartphones.
