

BlackBerry Professional Services Site Assessment Workshop

Take your BlackBerry architecture design to the next level

A thorough review of your BlackBerry® solution architecture by BlackBerry® Professional Services gives you the peace of mind of knowing you're getting top performance from your BlackBerry® Enterprise Server. Should fine-tuning be needed, we'll advise you on how to do that, too!

Key features of the three, five and ten-day workshops include:

- Complete review of your site, including configurations, hardware utilization, locations, number of servers, IT policies, and more
- Examination of growth, application rollout and upgrade plans and identification of gaps and opportunities within your plan
- Detailed reporting on guidelines and recommendations for process improvement
- Infrastructure readiness assessments and a BlackBerry Enterprise Architect onsite for the smoothest possible implementations
- Post deployment planning and support
- Guidance and advice with setting-up performance indicators and reviewing results
- Providing recommendations for improvement to infrastructure and processes

Ensure your infrastructure can keep pace with the increasing demands of your growing organization. Ask about a Site Assessment workshop from BlackBerry Professional Services.
