

BlackBerry Enterprise Server for Novell GroupWise

Compatibility Matrix

August 28, 2009

LEGEND

- ☑ **RECOMMENDED** Recommended configuration released with major release or service pack
- ✓ **SUPPORTED** The configuration is a supported environment
- ☑ **SUPPORTED BEST EFFORTS** A supported environment however RIM has not assessed the full impact so will support on a "best efforts" basis
- **PENDING** The 3rd party component is currently being assessed for compatibility
- ☒ **NOT RECOMMENDED** Compability issues exist and RIM does not recommend installation; unsupported configuration
- Ⓢ **SUNSET** Age of legacy software has placed environment in an unsupported state

How to Read the Compatibility Matrix
 As new service packs are released, the recommended versions were the environments tested at the time of the BlackBerry® Enterprise Server (BES) release. If a cell is blank it means that as new third party versions are released the general strategy is to test with the then current BlackBerry® Enterprise Server (BES) version so older versions were not necessarily reviewed or assessed for newer third party versions. Also as third party versions age, they will not necessarily be tested with current versions of BES.
