

## U.S. Export Controls Classification Information

Please note that BlackBerry Corporation (“BlackBerry”) is providing the Export Control Classification Numbers (ECCNs) below for reference purposes only. BlackBerry is not making any representations as to your eligibility to export or re-export BlackBerry software. All information is provided "as is" and is subject to change without notice. As the US exporter, you are responsible for compliance with the U.S. Export Administration Regulations (“EAR”) ([http://www.access.gpo.gov/bis/ear/ear\\_data.html](http://www.access.gpo.gov/bis/ear/ear_data.html)) administered by the U.S. Department of Commerce Bureau of Industry and Security (“BIS”), and any other applicable U.S. export laws and regulations.

Most of the BlackBerry software covered by the chart may be exported under the EAR to most destinations No License Required (“NLR”). Software with an ECCN of 5D002.c may be exported under the EAR to most destinations under License Exception ENC. However, these items may not be exported and re-exported to certain countries (currently Cuba, Iran, North Korea, Sudan and Syria) or to persons or entities prohibited from receiving U.S. exports, including those (a) on the Bureau of Industry and Security’s Denied Parties List or Entity List, (b) on the Office of Foreign Assets Control’s list of Specially Designated Nationals and Blocked Persons, and (c) for any prohibited end-use, including, without limitation, involvement with missile technology, nuclear, chemical or biological weapons, or military end-uses where prohibited by an applicable arms embargo.

Please be aware that certain software applications on BlackBerry smartphones may be licensed only for distribution and/or use in certain countries.

For further details on export restrictions applicable to ECCN 5D002.c, 5A992.c and 5D992.c products, please refer to the EAR. ([http://www.access.gpo.gov/bis/ear/ear\\_data.html](http://www.access.gpo.gov/bis/ear/ear_data.html))
